

Upgrade X12 Wallet on MacOS

In this short tutorial, you will learn how to upgrade X12 wallet.

1. Uninstall Wallet Application

Completely remove X12 Wallet.app, x12coin-wallet-cli, x12coind applications from installation folder (usually it's Applications folder):

2. Completely Remove X12 Wallet specific files

This step is optional and user should follow it only in case of trying to remove X12 Wallet completely.

Remove .x12coin folder from /Users/<user-name>/ folder.

If you don't see hidden files (files starting with '.') in corresponding folder navigate to that folder and press Command + Shift + '.' buttons you'll get the list of all hidden files available on Finder.

3. Installing Latest Version of X12 Wallet.

Once you've completely removed X12 Wallet application you can use following guide for installing latest wallet version:

“Installation guide for the wallet on Mac OS X”
