

Upgrade X12 Wallet on Windows

In this short tutorial, you will learn how to upgrade X12 wallet.

1. Uninstall Wallet Application

Go to X12 Wallet App from start menu and uninstall it from there:

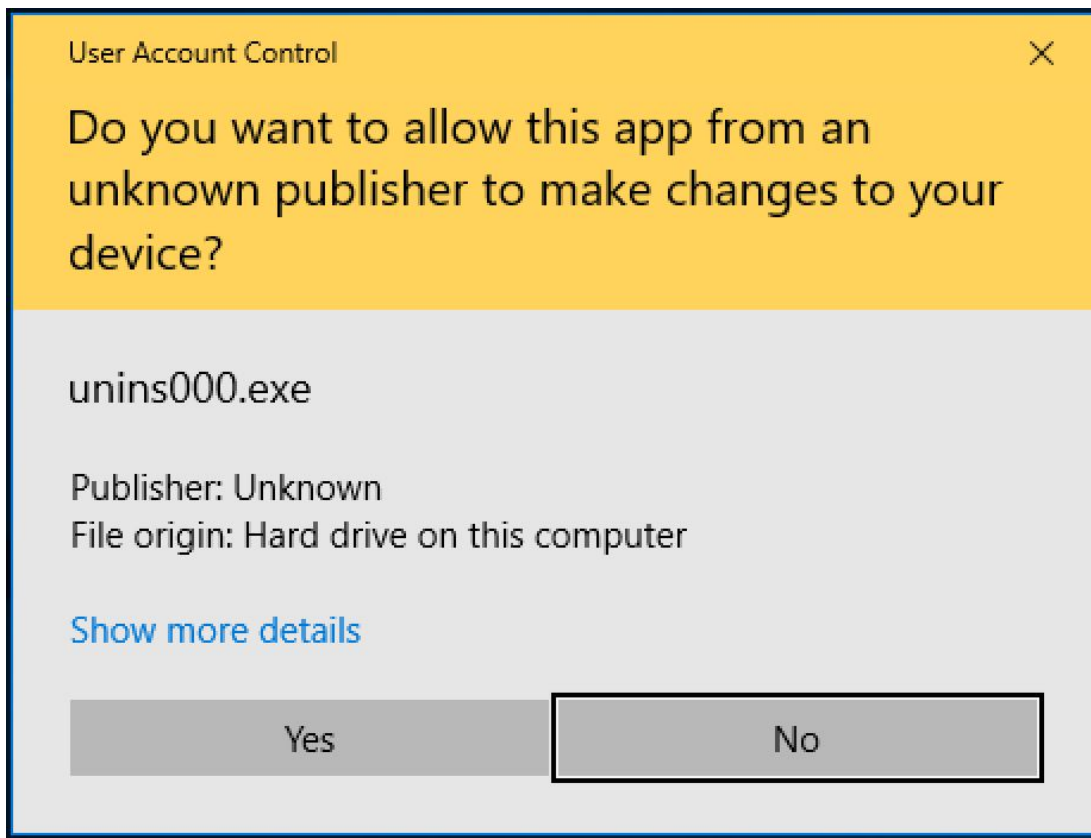

There is “Uninstall X12 Wallet” in corresponding application group.

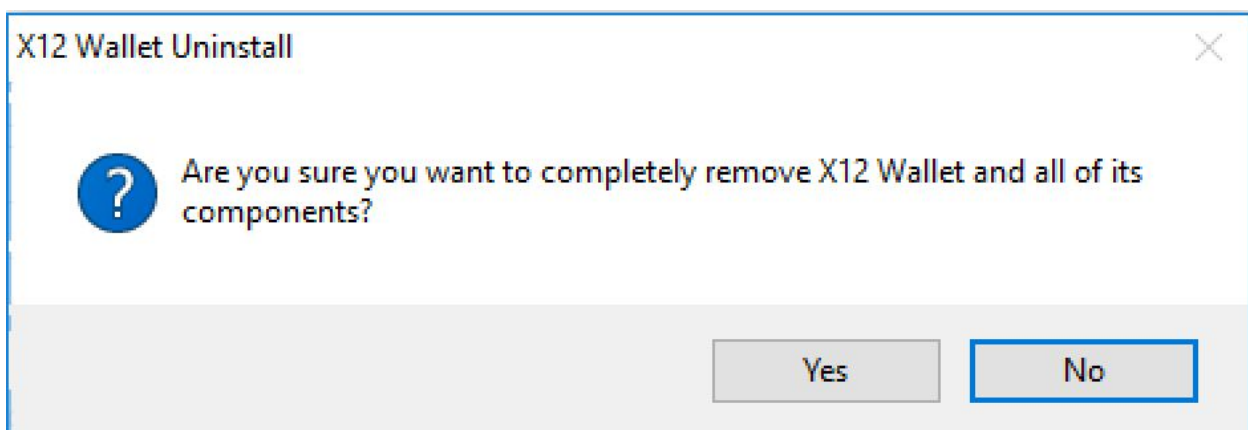

2. Allow Uninstall Process To Start

It'll open Popup that asks to allow to run uninstall program from unknown publisher:

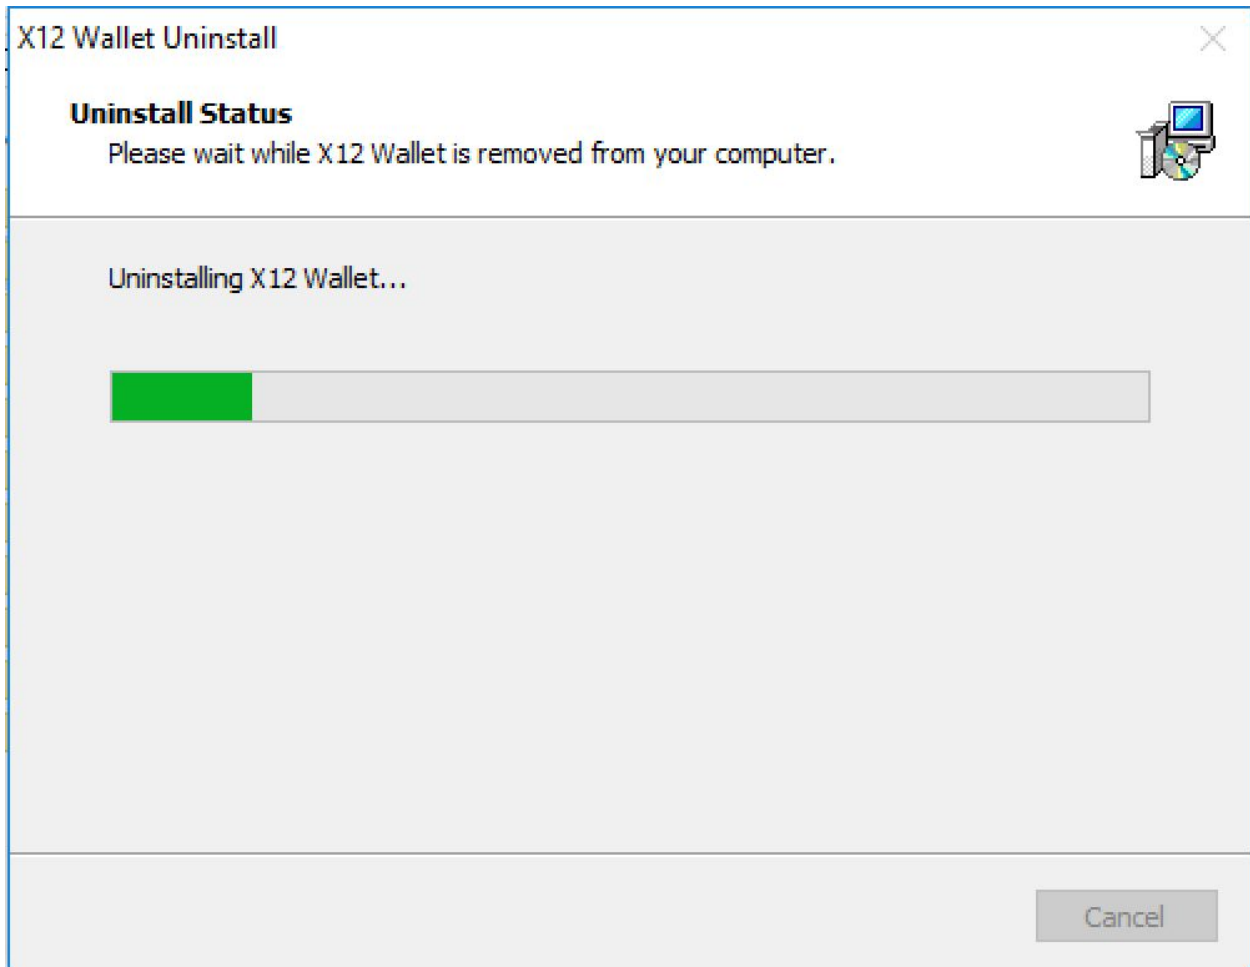

Please select "Yes" button to move forward. After that need to confirm X12 application removal:

3. Uninstall process

Click on "Next" button to move forward through application removal process:

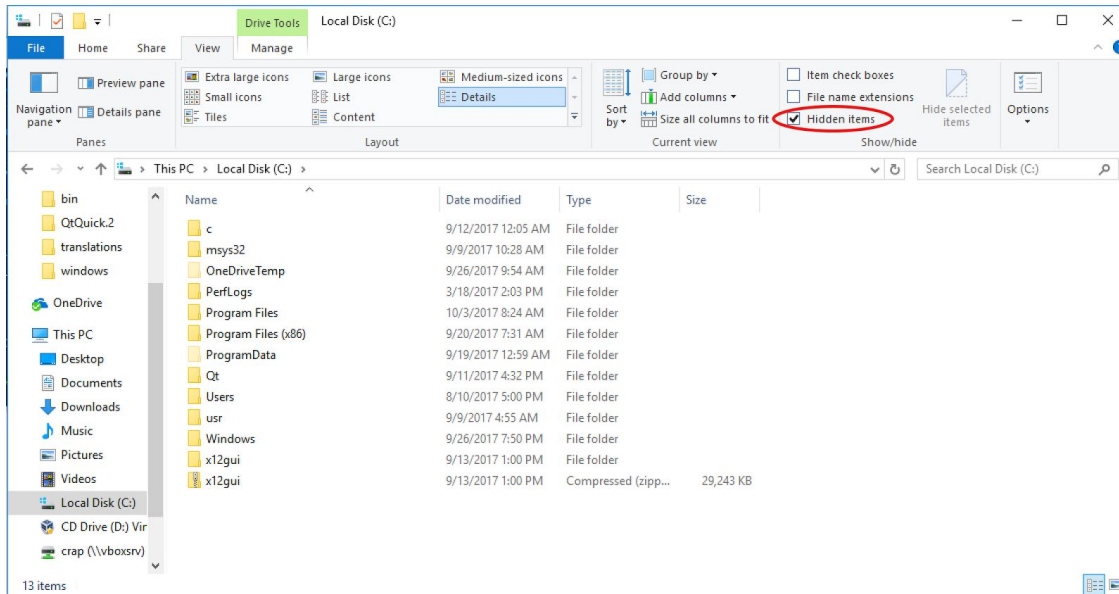

4. Completely Remove X12 Wallet specific files

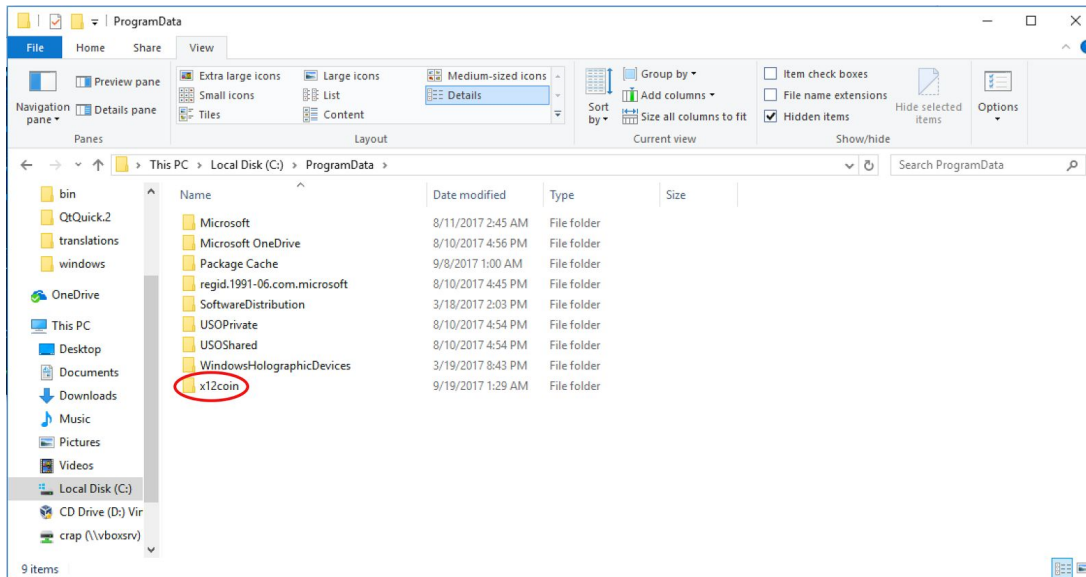

Those steps are optional and user should follow them only in case of trying to remove X12 Wallet completely.

First of all need to change File Browser options to be able to show hidden files:

Need to open File Browser. Navigation to "C:". Select "View" tab from menu and then set "Hidden Items" checkbox.

After that you'll see "Program Data" folder in corresponding window. Enter to that folder. There you'll see "x12coin" folder.

Need to remove that folder completely.

5. Installing Latest Version of X12 Wallet.

Once you've completely removed X12 Wallet application you can use following guide for installing latest wallet version:

“Installation guide for the wallet on Windows”
